NC COMMUNITY COLLEGES | COLLEGE & CAREER READINESS

Enhancing Adult Education with Digital Scavenger Hunts & AI COABE 2024 Session 4 November 21, 2024

Presented by Megan Norwood, ABE Coordinator, Caldwell CC&TI

COABE Presentations

- **Exploring the Potential of Digital Scavenger Hunts**
  - The presenter used an app called Goosechase for the scavenger hunt
- **ChatGPT: Transforming Classroom Instruction, Amplifying Lesson Planning, Empowering Student Learning!**
  - The presenter had all attendees create ChatGPT accounts and showed us how to effectively use AI and why

Goosechase
Interactive Scavenger Hunt App

- Submission Types: **Text, Picture, Video, Geolocation**
- Create & Customize: Name experience, add/edit missions, and choose duration (30 mins to 1 month)
- Start & Monitor: Launch experience and watch submissions in real-time
- Join with Code: Players enter code to participate (similar to Kahoot!)

Teamwork

Goosechase will also let players join on teams (depending on the creators guidelines) so that players can work together on missions or divide and conquer!

Recreational

$0 USD per month

Try for free

Up to 3 teams or 3 individual participants

Run 1 live Experience at a time

Up to 5 mobile devices per team

Unlimited Missions

Real-time activity feed

Automatic scoring and leaderboard

In-app creator-to-participant messaging

Submission downloads

Educator Basic

$0 USD per Experience

Try for free

Great for small one-off activities

Team mode only

Up to 5 teams per Experience

Up to 5 mobile devices per team

Unlimited Experiences

Run 1 live Experience at a time

Access to 250+ pre-built Experience templates

Compatible with tablets like Chromebooks and iPads

Participant login without personal email

Real-time activity feed

Support from the customer

Scavenger Hunt

- Time for us to have some fun and complete a scavenger hunt!
- A couple of important things to note before we get started:
  - We will be in breakout rooms and everyone in your breakout room is on your team!
  - ONE person will create a team name, you can be as creative as you want or use your breakout room number. Wait until that person has created that team, and then you will join the team they have created
  - Each team will have a code – please share this with your team members so they can join your team!
  - Remember, we can divide and conquer missions so in your group only ONE person has to complete the mission (it will disappear from the list on your phone after a minute or so after your team member completes it)
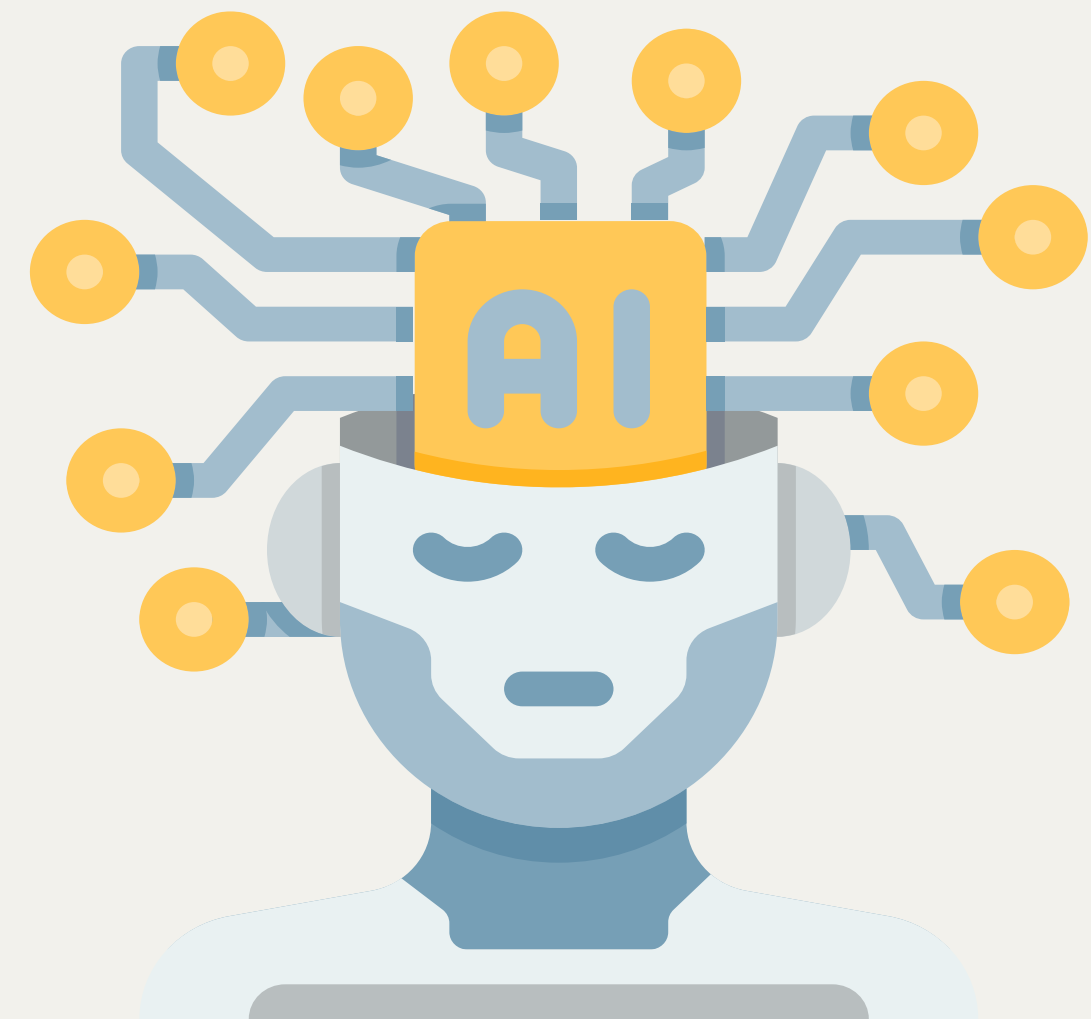

Your turn!

Add mission code

Considerations

- What barriers might students or instructors face in participating in or creating a digital scavenger hunt?
- For our administrators, what implications do you see for digital scavenger hunts beyond the classroom?

ChatGPT

- ChatGPT is a generative AI program "that can create [new content] that usually requires human intelligence"
- ChatGPT isn't the only generative AI program that can be utilized in this scenario!
- AI tools for education:
- AI for Education
- Eduaide.AI
- MagicSchool
- Diffit
- Curipod

What can AI do for me?

Streamline Planning

- Quickly generate lesson plans, quizzes, exit tickets, activities, etc.

Differentiate Instruction

- Tailor tasks to various reading and skill levels

Boost Creativity

- Use AI as a creative partner for new instructional approaches

Create Engaging Activities

- AI saves time and boosts interaction

Provide Instant Feedback

- Get suggestions for improving prompts and activities

Accessible Support

- Answer "how-to" questions for various tools and concepts

Enhance Engagement

- Create fun, tech-forward learning experiences

Customize ChatGPT

Custom Instructions ⓘ

What would you like ChatGPT to know about you to provide better responses?

0/1500   Hide tips 🚫

Thought starters

- Where are you based?
- What do you do for work?
- What are your hobbies and interests?
- What subjects can you talk about for hours?
- What are some goals you have?

How would you like ChatGPT to respond?

The Role of AI in Digital Scavenger Hunts

Mission Creator: generates unique, personalized challenges

- Ask AI to create content-specific scavenger hunt missions
- Don't forget to tell AI that there are multi-modal response option

Adapter: Adjusts difficulty based on learner performance

- You can tell AI the NRS levels of your students so that it can adjust the level of difficulty
- If you do not like the missions that it provides, you can ask for more that are not similar to the previously generated response

Let's take a look at a ChatGPT conversation
