## Teacher quick-start checklist

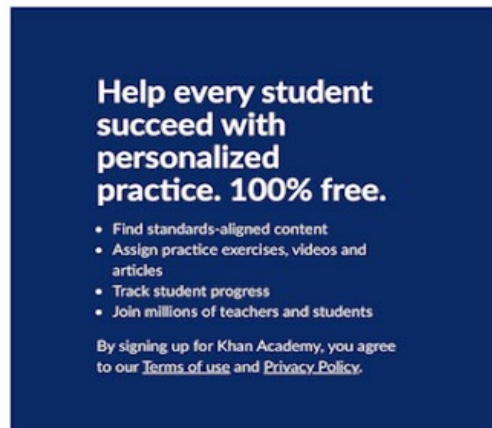

A list of the 4 most important steps to getting started on Khan Academy.

 Google Classroom  Facebook  Twitter  Email

Welcome to Khan Academy!

Follow these four steps to begin using Khan Academy with your students.

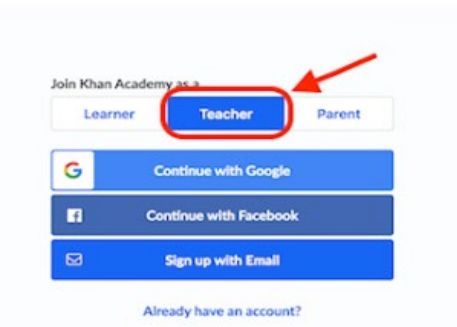

- **Step 1: Create your account.** Go to [khanacademy.org](https://www.khanacademy.org). Select **Join Khan Academy** as a **Teacher** and follow the prompts to create your account.

**Help every student succeed with personalized practice. 100% free.**

- Find standards-aligned content
- Assign practice exercises, videos and articles
- Track student progress
- Join millions of teachers and students

By signing up for Khan Academy, you agree to our [Terms of Use](#) and [Privacy Policy](#).

Join Khan Academy

Learner  **Teacher**  Parent

 Continue with Google

 Continue with Facebook

 Sign up with Email

Already have an account?

**Note:** No matter what you select, once you start creating your account you'll have the option to identify yourself as a learner, teacher, or parent. For more information

# Adding a class

The screenshot shows the Khan Academy interface for a user named 'ikstevens659'. At the top, there is a navigation bar with 'Courses', a search bar, the Khan Academy logo, 'Donate', and the user's name. Below this is a welcome message: 'Welcome, ikstevens659' and 'Add your school'. The main content area has tabs for 'Classes', 'Students', and 'Resources'. Under the 'Classes' tab, there is a section titled 'Your classes' with a list of three classes: 'Andrew at home: Multiple courses' (1 student), 'CCR from home: Multiple courses' (4 students), and 'Grace at home: Multiple courses' (1 student). A red arrow points from the bottom right towards the 'Add new class' link in the top right corner of the 'Your classes' section.

✕ Add new class

### How would you like to add your students?

**Invite your Google Classroom**

The fastest, easiest way to invite your students.

**Students join with a class link**

Email or share a link, or have your students use a class code.

**Create your students' accounts**

Enter student names and we'll make passwords you can customize.

Before inviting students, please note that Khan Academy assumes you have received parent permission for any students under 13. Download our sample parent notice (available in multiple languages).

Back Next

✕ Add new class

### Have your students create their own accounts

Copy, then email or share this link with your students.

Copy

Or have your students visit [www.khanacademy.org/join](https://www.khanacademy.org/join) and enter your class code **TKWZTRHW**.

# Mastery Challenge

## What are Mastery Challenges?

Mastery Challenges are a way for students to review and practice previous-learned skills in a course. They also provide another way, beyond Unit Tests and Course Challenges, for students to level up or down in currently Proficient skills.

# Mastery Challenges continued

## Where can students find Mastery Challenges?

Mastery Challenges aren't always available to students; they are unlocked when a student meets the following conditions:

- They have reached the Familiar level for at least 3 skills in the given course,
- They have reached the Proficient level for at least 1 skill in the given course, and
- It's been 12 hours or more since they last started a Mastery Challenge (or they have never started one).

Once unlocked, Mastery Challenges are found on the main Course page of mastery-enabled courses.

**Note:** Mastery Challenges are currently only available in Math courses.

# Mastery Challenges

## Mastery Challenges in Course Mastery - 2020

[Go to lesson page](#)

Mastery Challenges review 3 skills in each challenge, devoting 2 questions to each skill:

- If a student answers both questions correctly, they level up in that skill.
- If a student answers both questions incorrectly, they level down in that skill
- If a student answers 1 question correctly and 1 question incorrectly, their level remains the same for that skill.

×

Leveled up: 1 skill

Leveled down: 1 skill

No change: 1 skill

4/6 correct · 270 energy pts

Skill level changes

Cube roots

Equations with variables on both sides: decimals & fractions

Combining like terms with rational coefficients
